

Inventory of Forward Thinking Activities Worldwide

Following the Foresight Exchange Workshop held in Beijing in October 2011 which brought together around 30 foresight practitioners and was part of the activities of the Global Foresight Hub developed through GFAR, the inventory of activities related to the anticipation/exploration of the future of agriculture, rural development and farming systems was launched on December 7 until January 15, as a preliminary step in the operation of the Global Foresight Hub.

Inventory forms have been sent through CGIAR database of addresses to ensure a wide and open inclusion of all potential organizations whatever the sector (private, Farmer organizations, NGOs, CSO, Universities, Governments, etc.). The results of this first step will be shared with relevant organizations.
